KIRUTHIKA ARUCHAMY

DATA ANALYST | SQL | PYTHON | POWER BI | TABLEAU | SNOWFLAKE | STATISTICAL ANALYSIS

Bengaluru, India | +91 96777 85105 | onkiruthika@gmail.com | linkedin.com/in/kiruthika-aruchamy-80257a229

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience at Accenture delivering analytics, reporting, and data engineering solutions for global enterprise clients Chevron and Loblaws. Advanced SQL, Python, Power BI, DAX, Snowflake, and ETL expertise, with hands-on ownership of enterprise datasets exceeding 86M records. Delivered measurable impact: 25% faster enterprise reporting, 30% fewer data inconsistencies, and 10+ executive KPI dashboards. M.Sc. in Statistics with applied strength in hypothesis testing, regression, and exploratory data analysis.

CORE COMPETENCIES

SQL & Query Optimization • Data Modeling & Warehousing • ETL/ELT Pipelines • Dashboards, KPIs & Business Intelligence • Statistics & A/B Testing • Data Quality & Governance • Predictive Analytics • Stakeholder Management

TECHNICAL SKILLS

Programming & Querying: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), SQL (joins, CTEs, window functions, stored procedures, indexing, query optimization), T-SQL, PostgreSQL, MySQL

BI & Visualization: Power BI (DAX, Power Query/M, data modeling, star schema, RLS, Power BI Service), Tableau, Advanced Excel (Pivot Tables, VLOOKUP/XLOOKUP, Macros/VBA, Power Pivot)

Cloud & Data Engineering: Snowflake, AWS, Google BigQuery, SQL Server, Alteryx, ETL/ELT pipeline development, data integration, data warehouse and dimensional schema design

Statistics & Analytics: EDA, hypothesis testing, A/B testing, regression analysis, descriptive and inferential statistics, RFM/customer segmentation, clustering, forecasting, root cause analysis

Data Management & Tools: Data cleaning and wrangling, validation, quality, profiling, governance, requirement gathering, Git, GitHub, Jupyter Notebook, Jira, Confluence, Agile/Scrum

PROFESSIONAL EXPERIENCE

Accenture — Data Analyst | Jun 2023 – Present | Bengaluru, India

Analytics, reporting & data engineering for energy, logistics, and retail clients.

Client: Chevron — Energy & Logistics

- Accelerated enterprise reporting by 25% by performance-tuning complex SQL joins, CTEs, and indexing strategies across 86M+ records in Snowflake.
- Designed and deployed 10+ Power BI dashboards with advanced DAX measures and row-level security (RLS), strengthening operational visibility and route efficiency.
- Engineered ETL pipelines that unified fragmented multi-source logistics data into a single governed data model, standardizing cross-team reporting.
- Translated complex data into executive KPI reports for senior leadership, enabling faster, evidence-based decisions on cost and delivery performance.
- Documented data dictionaries, KPI definitions, and reusable SQL logic to accelerate analyst onboarding and improve report consistency.

Client: Loblaws — Retail

- Generated actionable retail insights for 2,500+ stores by building enterprise KPI dashboards and trend analysis that pinpointed key revenue drivers and sales fluctuations.
- Reduced data inconsistencies by 30% by developing automated validation scripts in SQL and Python that detect anomalies, trace root causes, and streamline reporting workflows.
- Translated business requirements into SQL schemas and star-schema Power BI data models for self-service analytics.
- Collaborated with cross-functional sales, order, and product teams to enforce data accuracy and consistency across 2,500+ stores and 12+ product categories.
- Conducted ad-hoc statistical deep dives — trend, variance, and root cause analysis — to answer leadership questions on category and store performance.

KEY PROJECTS

Customer Segmentation — KPMG Virtual Experience (Python, Excel): Applied RFM analysis and clustering across 4,000+ customer records to identify high-value segments and recommend targeted retention and growth strategies.

Walmart Sales Intelligence (SQL): Analyzed 1,000+ transactions across multiple branches using CTEs, window functions, and aggregations to surface top-performing products, peak sales periods, and revenue trends.

EV Market Analysis (Python — Pandas, Matplotlib, Seaborn): Performed exploratory data analysis on electric vehicle pricing, demand, and market segments to surface adoption patterns and inform positioning strategy.

EDUCATION & CERTIFICATIONS

M.Sc. Statistics — Bharathiar University, Government Arts College, Coimbatore, CGPA: 8.6/10 | 2021–2023

B.Sc. Statistics — Bharathiar University, Government Arts College, Coimbatore, CGPA: 7.6/10 | 2018–2021

Microsoft Certified: Power BI Data Analyst Associate (PL-300) • Google Data Analytics Professional Certificate
